

Second Australasian Ground Control in Mining Conference 2010

23 – 24 November 2010, The University of New South Wales, Sydney, Australia

The Conference

The **Second Australasian Ground Control in Mining Conference** follows the first Conference held in 2003 and is aimed at practical mine site operators, technical support staff, geotechnical engineers, mining engineers, consultants and researchers in the field of mining geomechanics and ground control. The Conference will provide an update to all mining industry geotechnical personnel best practice in both Australasia and overseas, and an information exchange vehicle between the coal and metalliferous sectors of the industry, with a focus on new technologies and developments; industry needs and mine site problem solving; and practical case studies.

The Organising Committee invites you to register and looks forward to seeing you in Sydney!

Conference Chairs:

Paul Hagan, UNSW
Serkan Saydam, UNSW

Keynote Presentations

Ground Support Selection and Performance in Seismically Active Mines
— *Dr Peter Fuller, Senior Principal, Coffey Mining*

Pillar Design in Rock Mines: Can we do this with Confidence —
Dr Francois Malan, Director, Groundwork Consulting

Education and the Role of Geotechnical Professionals in the Mining Industry — *Professor Bruce Hebblewhite, Head of School, School of Mining Engineering, The University of New South Wales*

Workshops

- **An Overview of Current Challenges and Recent Developments in Managing High Stress Conditions**
- **Coal Pillar Design Considerations – Theory and Practice**
