

OREBODY MODELLING AND SMP 2014 – CONTENTS

Increasing Value and Productivity in Unforgiving Markets

Not for the Faint-Hearted	<i>J Whittle</i>	3
Cost Management Optimisation	<i>B King</i>	7
Stochastic Optimisation of Mineral Value Chains – Developments and Applications for the Global Optimisation of Mining Complexes with Uncertainty	<i>R Goodfellow and R Dimitrakopoulos</i>	13

Global Optimisation of Multiple Operations and Processes

Optimising a Mineral Supply Chain under Uncertainty with Long-term Sales Contracts	<i>J Zhang and R Dimitrakopoulos</i>	25
Life of Asset Planning, Uncertainty and Value Optimisation of the Iron Ore Business – From Exploration, to Market, to Closure	<i>J McCluskey and N Barros</i>	33
Strategies for Mine Planning and Design	<i>P A Dowd, C Xu and S Coward</i>	41

Advances in Conditional Simulation for Complex Applications

Joint Simulation of Correlated Variables Using High-order Spatial Statistics for Orebody Modelling	<i>I Minniakhmetov and R Dimitrakopoulos</i>	53
Approaches to the Simulation of Compositional Data – A Nickel-Laterite Comparative Case Study	<i>U Mueller, R Tolosana-Delgado and K G van den Boogaart</i>	61
Optimal Inference of Modelling Parameters to Simulate Complex Trends across Soft Boundaries – A Case Study in Heavy Mineral Sands	<i>T Wambeke and J Berndorf</i>	73
Applicability of Categorical Simulation Methods for Assessment of Mine Plan Risk	<i>A Jewbali, R Perry, L Allen and R Inglis</i>	85
Multivariate Block Simulations of a Lateritic-type Nickel Deposit and Post-processing of a Representative Subset	<i>O Bertoli, J Deraisme and P Epinoux</i>	99
Assessing Uncertainty with Drill Hole Spacing Studies – Applications to Mineral Resources	<i>G Verly, T Postolski and H M Parker</i>	109

Global Optimisation Applications

Incorporation of a Full Process Plant Model as an Active Constraint for Mine Planning and Production Scheduling	<i>R A Bearman, P Cesare, S Munro and D Wandel</i>	121
Application of the Theory of Constraints to Strategic and Tactical Mine Planning	<i>A Finch and T Elkington</i>	129

An Application of Simultaneous Optimisation – Improving the Payback Period of a Zinc-Copper Open Cut Project *D J Thobaven* **137**

Aspects of Open Pit Mine Planning

Open Pit Strategic Mine Planning with Automatic Phase Generation *G Juarez, R Dodds, A Echeverria, J I Guzman, M Recabarren, J Ronda and E Vila-Echague* **147**

Applying Modern Heuristics to Maximising Net Present Value through Cut-off Grade Optimisation *C A Myburgh, K Deb and S Craig* **155**

Predicting Mill Ore Feed Variability Using Integrated Geotechnical/Geometallurgical Models *J Jackson, J Gaunt and M Astorga* **165**

Comparison between Gaussian Processes and Dynamic Time Warping for Classification of Marker Shales in Iron Ore Deposits *K Silversides and A Melkumyan* **177**

Aligning Resource Estimates with Mine Planning *D Kentwell* **185**

Advances in Optimisation of Open Pit and Underground Mine Planning

Open Pit Transition Depth Determination through Global Analysis of Open Pit and Underground Mine Production Scheduling *K Dagdelen and I Traore* **195**

Globally Optimising Open Pit and Underground Mining Operations under Geological Uncertainty *L Montiel, R Dimitrakopoulos and K Kawahata* **201**

Consideration for Multiobjective Metaheuristic Optimisation of Large Iron Ore and Coal Supply Chains, from Resource to Market *J Balzary and A Mohais* **213**

Sensor-based Real-time Resource Model Reconciliation for Improved Mine Production Control – A Conceptual Framework *J Benndorf, M Buxton and M S Shishvan* **223**

Strategic Underground Mine Access Design to Maximise the Net Present Value *K G Sirinanda, M Brazil, P A Grossman, J H Rubinstein and D A Thomas* **235**

Implementing a New Heuristic Approach to the Underground Mine Stope Layout Problem *D S S Sandanayake, E Topal and M W A Asad* **243**

Adaptation of an Open Pit Optimiser for Underground Strategic Planning *B Roberts and M Bloss* **249**

Advances and Applications in Mine Optimisation

Demonstrating Efficiency Gains from Installing Truck Turntables at Crushers *M Brazil, P A Grossman, J H Rubinstein and D A Thomas* **259**

Is Truck Queuing Productive? *D Kostyuk, S Thomas, P Malkin and P M Stone* **267**

Enhancing Risk Management in Strategic Mine Planning through Uncertainty Analysis	<i>C Fricke, P Velletri and R Wood</i>	275
Cut-off Grade-based Sublevel Stope Mine Optimisation – Introduction and Evaluation of an Optimisation Approach and Method for Grade Risk Quantification	<i>M T Bootsma, C Alford, J Benndorf and M W N Buxton</i>	281
Geometallurgical Modelling and Ore Tracking at Kittilä Mine	<i>D La Rosa, L Rajavuori, J Korteniemi and M Wortley</i>	291
Simulation Optimisation of Mine Operational Plans	<i>H Askari-Nasab, S P Upadhyay, E Torkamani, M Tabesh and M M Badiozamani</i>	299
Mine Production Scheduling, Stockpiling and Blending		
Capital Expenditure Modelling for Strategic Mine Scheduling	<i>L Blackwell</i>	315
Stochastic Production Scheduling – Solution through Lagrangian Relaxation with the Branch-and-cut Algorithm	<i>S Chatterjee</i>	323
An Open Pit Multistage Mine Production Scheduling Model for Drilling, Blasting and Excavating Operations	<i>E Kozan and S Q Liu</i>	329
Optimising the Long-term Mine Waste Dump Progression and Truck Hour Schedule in a Large-scale Open Pit Mine Using Mixed Integer Programming	<i>Y Li, E Topal and S Ramazan</i>	335
Ore Selection Optimisation for an Iron Ore Deposit Using Linear Programming	<i>M Aros and L Reilly</i>	345
Simulating Extraction Shapes to Understand Financial Risk Using High Performance Computing	<i>E Lima, D Gregory, A Lapworth and C Faria</i>	351
On the Open Pit to Underground Transition		
A Stochastic Optimisation Formulation for the Transition from Open Pit to Underground Mining within the Context of a Mining Complex	<i>J MacNeil and R Dimitrakopoulos</i>	363
Modelling Open Pit and Underground Production Scheduling in Concert	<i>B King</i>	369
Strategic Innovation and Research Needs		
Improving the Accuracy of Uncertainty Models through High-order Conditioning	<i>M Godoy and C Meagher</i>	377
On the Joint Multipoint Simulation of Discrete and Continuous Geometallurgical Parameters	<i>K G van den Boogaart, R Tolosana-Delgado, M Lehmann and U Mueller</i>	379

Solving a Large Stochastic Integer Programming Model for Production Scheduling at a Gold Mine with Multiple Processing Streams and Uncertain Geology	<i>M de Freitas Silva</i>	389
Production Schedule Optimisation – Meeting Targets by Hedging against Geological Risk while Addressing Environmental and Equipment Concerns	<i>M Spleit</i>	397
Parallel Implementation of a Tabu Search Procedure for Stochastic Mine Scheduling	<i>R Senécal and R Dimitrakopoulos</i>	405
Mineral Supply Chain Optimisation under Uncertainty Using Approximate Dynamic Programming	<i>C Paduraru and R Dimitrakopoulos</i>	415
Author Index		423
