

Sampling 2010

11 – 12 May 2010, Perth, Western Australia

The Conference

Sampling 2010 is a sequel to the very successful Sampling 2008 conference held in Perth in May 2008. It is being organised to bring together managers, geologists, engineers, metallurgists, grade controllers, samplers, chemists and consultants involved in all aspects of sampling mineral commodities, including resource estimation, quality control and export. Sampling 2010 will provide a great opportunity for networking, meeting respected international sampling experts, sharing ideas and catching up on the latest developments. The conference is being jointly organised by The Australasian Institute of Mining and Metallurgy (The AusIMM) and CSIRO Minerals.

Keynote Presenters

- Grade Control Sampling in Underground Gold Mines – A Critical Appraisal — *S Dominy*
- Sampling Challenges for the Copper Industry — *P Carrasco*
- Principles of a Sampling Standard – A Quantitative Quality Index for Samplers – Empirical Testing and Validation of Type Designs for Sampling in the Bulk Handling Industry — *K H Esbensen*
- The State of Sampling Practice in the South African Minerals Industry — *R Minnitt*
- Sampling Quality Assurance and Quality Control Requirements for Mining Projects — *F F Pitard*
- Are Blasthole Samples that Bad and RC Samples that Good for Grade Control? Story of Trade-Off? — *D Francois-Bongarcon*

Event Management: The AusIMM
