Speakers

UNSW Minerals and Energy Resources Engineering will host the 21st Kenneth Finlay Memorial Lecture, followed by the annual Alumni and Industry Dinner.

The lecture will be delivered by Professor Hugh Durrant-Whyte, newly appointed NSW State Chief Scientist and Engineer.

Hugh will explore the immense opportunities that data automation and innovation has created in the mining industry. With a twenty-five year forward view of digital mining, Professor Durrant-Whyte will showcase the imperative changes that the mining sector will need to adapt in order to remain competitive in the digital age.

The lecture will run for about 1.5 hours and includes a Q&A session with Professor Durrant-Whyte, after which will be a ticketed three course, sit-down dinner and networking function.
