Mining Industry Snapshot and Key Trends

Andrew Forman
Partner, PwC

Registrations are now open for the AusIMM Adelaide Branch July Technical Lunch featuring guest speaker Andrew Forman (PwC), who will be presenting on: “**Mining Industry Snapshot and Key Trends**”. The recently released PwC review “Mine 2018 Tempting Times” provides an analysis of the global mining sector and the performance of the top 40 companies globally. It shows that while the outlook is bright, our industry needs to stay focussed to deliver on long term aspirations - and create a sustainable resources sector.

Andrew Forman is PwC’s Mining Industry leader in SA and has been involved in working with companies across the mining sector, from smaller exploration companies through to some of the largest global mining companies over more than 30 years. He has been actively involved in analysis of the sector through many years and regularly presents to mining industry participants. PwC has been a major supporter of the AusIMM 125th “Thought Leadership Series” in 2018 and actively supports the resources sector.

Jack Kent, a final year Mining Engineering student at the University of Adelaide and Graduate Mining Engineer with Byrnescut, will also be presenting “**Kanmantoo Copper Mine to Mill Optimisation: Maximising value return through blast design**”. Jack is a recipient of a 2018 AusIMM Education Endowment Fund Premium Scholarship.
